

Plastic elbow for oval semi-rigid ducting **FLX-VBH/FLX-VBW**

Description

FLX-VBH/FLX-VBW oval plastic elbow have male ends to connect with HDPE semi-rigid oval ducts sized 132-52 mm.

FLX-VBH horizontal elbow 90°: helps with a very complex routing of ductwork bends which would be impossible to make using only ducting.

FLX-VBW elbow: enables quick turn upwards of the conducted installation - which is necessary, for example, when running ducts along the floor and then the walls of the room.
