

Round vane supply diffusers

ITG

Description

The ITG long-range round vane supply diffuser is designed for providing high air supply rate. The temperature of the air supplied can be lower by up to 12°C than the indoor temperature. This enables using ITG diffusers in cold storage rooms. The air flow angle can be adjusted in the range of 15° to 30°. The air flow cohesion can be adjusted by rotating the diffuser by 180° in either direction.

Material: galvanized steel sheet

Finish: powder-coated

Standard colours: RAL 9010

All RAL palette colours are available on request.
